Spectrum BioScience Inc.

President and Founder

Responsible for all aspects of Spectrum BioScience, a logistics company specializing in the management of research compounds used by pharma and agrichemical companies for discovery research. Managed the startup, marketing, financing, and business development. Spectrum BioScience function is to store, plate and distribute screening compounds to drug discovery projects for life science companies.

PAST POSITIONS

SPECS and BioSPECS B.V.

Director of North American Operations

January 1, 2001 to present

Established the North American office for SPECS and BioSPECS, a Dutch company located in The Netherlands. I report to the Managing Director. Responsible for sales of their products and services through out the United States and Canada. Increased collection of overdue invoices to nearly 100%. Developed new markets by participation at scientific meetings. Hired a sales force and support staff, and managed all aspects of administrative duties. The company sells research chemicals to biotechnology companies and pharmaceutical companies for drug discovery and development. Also, support services include compound handling, cheminformatics, acquisition of organic compounds from academia and contract and custom organic synthesis.
