

# ADVANCED DESIGN THINKING

## Program Overview

Tackle your most complex challenges with co-creation.

You've mastered the basics with Introduction to Design Thinking—now take your problem-solving abilities to the next level by learning the art and science of co-creation. Co-creation is considered by some industry leaders as the pinnacle of human-centered design. It involves collaborating with your stakeholders or end users to achieve creative solutions — together. Participants taking Advanced Design Thinking should have demonstrated mastery of design thinking techniques by successfully completing the prerequisite of the Introduction to Design Thinking course.

In our immersive Advanced Design Thinking course, you'll take your creativity to the next level by learning the best practices for co-creation. Work with industry-peers in an advanced learning environment and acquire new ways to further unlock your team's creative potential.

Advanced Design Thinking is the second course required to earn the [Executive Certificate in Design Thinking for Innovation](#).
