RESEARCH GRANT PARTICIPATION

Current Projects

“Promoting Embedded Research in the Learning Health System”

12/01/23-11/30/28

Agency for Healthcare Research and Quality

Jodi Segal/**Jill Marsteller**, Multiple Principal Investigators (25%)

The project aims to build a Learning Health System research and training center that will equip embedded researchers to carry out research necessary to produce best patient outcomes. Project will train 10 embedded researchers in partnering institutions and one fellow annually. Extensive program evaluation will be conducted. (1 P30 HS029772-01)

“Expanding Access to Pregnancy Specific Opioid Use Disorder Treatment in Jail: Piloting an Adaptable Implementation Strategy to Advance Equitable and Patient-Centered Care (Mom Care)”

4/15/23-4/21/26

National Institute on Drug Abuse

Carolyn Sufrin (SOM), Principal Investigator

Co-Investigator (1%). This study develops and test an implementation resource to support and enhance jails providing medications for opioid use disorder to pregnant and postpartum people in custody. (1R34DA056014-01A1)

“Advancing and Optimizing a Benchmark for Training and Management of Dog/Vet Programs (Wounded Warrior Service Dog Program)”

9/30/23-9/29/24

MTEC (subcontract to Ramirez, CSU-LB)

Jill Marsteller, Principal Investigator (5%)

Provide methodological and implementation guidance to the principal investigator who is developing standards for service dog training and vetting them with organizations that train emotional support dogs for US Army Veterans.

“Working through the Pain: Understanding Challenges and Strategies of Construction Workers Dealing with Pain”

03/01/2022-09/30/2024

LHSFNA, Laborers' International Union of North America

Jill Marsteller and Yea-Jen Hsu, Multiple Principal Investigators (5% effort)

Conduct survey and claims data analyses to understand construction worker’s pain treatment and coping strategies.

“Accelerating Collaborations for Mentoring and Equity (ACME)”

12/15/2020-12/14/2022 (NCE to 09/15/24)

Robert Wood Johnson Foundation

Jill Marsteller and Albert Wu, Multiple Principal Investigators (15%)

Pair junior researchers from historically underrepresented groups with mentors to assist them with specific research projects as well as career development and managing life in junior faculty positions. Continue matching applicants to RWJF programs with appropriate evaluators or other services.

“Accelerating Change and Transformation in Organizations and Networks IV (ACTION IV)

Partnership Management and Administration”

2020-2025

Agency for Healthcare Research and Quality

Jill Marsteller, Program Director (0%).

Lead and coordinate a network of 41 organizations to bid as a preferred source on AHRQ-released Task Orders in the area of quality and patient safety. Facilitate growth and development of researchers through RFTO response process and oversight of conduct of TOs.

“Improving Adult Vaccination Coverage Through Partnerships with Providers and National Organizations”

08/1/2020-07/31/2025

Subcontract to American College of Physicians.

(ACP Funder: Centers for Disease Control and Prevention)

Jill Marsteller, Principal Investigator (5%).

Project includes evaluation of the wider dissemination of the ACP primary care practice collaboratives seeking to increase adult immunizations.

“The Mid-Atlantic Center for Cardiometabolic Health Equity (MACCHE)”

09/24/21–06/30/26

NIH/NIMH

Cooper, L.A./Crews, D., Principal Investigators.

Co-Investigator (7%). The overarching goal of the MACCHE is to test the effectiveness of comprehensive, integrated, and multi-level evidence-based strategies for improving cardiometabolic health outcomes among socially disadvantaged populations in Maryland, using community-based participatory research and patient-centered outcomes research principles, and translate them into clinical and public health practice and policy. The MACCHE includes 3 separate, but related intervention studies addressing disparities in cardiometabolic disease; 3 integrated cores (Administrative, Investigator Development, and Community Engagement); an Executive Committee; and a Community Advisory Board. (1P50MD017348-01)

“The Home Infusion Collaborative to Eliminate Central Line-Associated Bloodstream Infections”

09/30/20-07/31/25

AHRQ

Sarah Keller, Principal Investigator.

Co-Investigator (5%). Advise on implementation issues in preventing CLABSI in patients’ own care of central lines present for home infusion.

“Connecting FEP Research and Practice through a Learning Health System”

09/07/2020 – 08/31/2024

UMMI/NIMH

Russ Margolis and Melanie Bennett (UMD), Principal Investigators.

Co-Investigator (14%). The goal of the proposed project is to establish a multi-clinical network of early psychosis clinics (an “epinet”), collecting the same data, and jointly analyzing that data to improve clinical care as Learning Health System (LHS). Leading the LHS activities. (1R01MH120550-01A1)

“Institute for Clinical and Translational Research”

05/01/19-04/30/24

NCATS, NIH

Daniel Ford, Principal Investigator.

Co-Investigator (15%). Act as one of two translational research community leads for the Behavioral, Social and Systems Science TRC. (UL1TR003098)

“Hidden in Plain Sight: Stigmatizing Language in Patient Medical Records”

01/2022 - 12/2026

NIH/NIMHD

Mary Catherine Beach, Principal Investigator.

Co-Investigator (5-35%). The goal of this project is to define and develop a taxonomy of stigmatizing language in medical records, to measure and test for bias in the use of stigmatizing language using natural language processing methods, and to reduce stigmatizing language in medical records using implementation science strategies. Marsteller leads the implementation science portion of the intervention and evaluation. (R01 MD017048-01)

“Respiratory Culture Stewardship to Reduce Antibiotic Use in Critically Ill Children”

05/15/2022-02/28/2027

AHRQ

Aaron Milstone, Principal Investigator.

Co-Investigator (5%). The purpose of this project is to demonstrate that diagnostic stewardship of respiratory cultures among mechanically ventilated children is an effective strategy to reduce unnecessary antibiotic use in critically ill children. Marsteller provides Implementation Science advisement to the quality improvement collaborative. (1R01HS028634-01)

“Implementation of Evidence-Based Strategies to Optimize HPV Vaccination in Rural Primary Care Settings”

08/21/22-4/30/23

NIH

Elisa Rodriguez, Roswell Institute, Principal Investigator.

Co-Investigator (6%). This project seeks to increase HPV vaccination in rural primary care clinics in New York State using a quality improvement collaborative approach. Marsteller provides training and advises project implementation and evaluation. (1R01MD016850-01)

Previous Projects

“Armstrong Institute Center for Diagnostic Excellence-Pursuing Scalable System-Level Diagnostic Quality, Value and Equity by Applying Safety Science to Emergency Department Diagnosis”

9/30/22-9/29/26

AHRQ

David Newman-Toker, Kathryn McDonald, Principal Investigators.

Co-Investigator (5%). This four-year program is designed to support the Armstrong Institute Center for Diagnostic Excellence at Johns Hopkins in its pursuit of improved diagnostic quality and safety by integrating Safety I (“find-and-fix”) and Safety II (“resilience engineering and high-reliability organizing”) principles intended to improve diagnosis and eliminate preventable misdiagnosis-related harms. The project includes specific demonstration projects and programs in the emergency department focused on direct prevention of patient harms, but also will strengthen external partnerships for networked learning, and seek greater sustainability of long-term efforts. The Center’s work will be situated within a wider network of related centers around the nation. Marsteller contributes implementation and evaluation advisement. (R18 HS29350-01)

“A Hybrid Type 1 Effectiveness-Implementation Study of Education Strategies for Vascular Access Creation in Advanced Kidney Disease”

09/01/2022-08/31/2027

National Institute of Diabetes and Digestive and Kidney Diseases/NIH

Deidra Crews/ Jennifer Flythe/ Laura Dember, Principal Investigators.

Co-Investigator (5%). In this trial among people with advanced kidney disease planning for hemodialysis, we will: 1) compare the effectiveness of three education strategies (focused vascular access education, motivational interviewing-enhanced vascular access education, and usual care) for increasing pre-dialysis arteriovenous access creation and 2) evaluate the implementation of the education strategies to inform equitable and effective implementation in the non-trial setting. (R01DK132367)

“ALACRITY Center for Health and Longevity in Mental Illness: Improving Physical Health and Decreasing Premature Mortality.”

09/01/2018-08/30/23

NIMH

Gail Daumit and Emma Elizabeth McGinty, Principal Investigators.

Co-Investigator (3%). Member of the Implementation Science methodology core for the Center. (1 P50 MH115842-01)

2022-2023 Multiple Principal Investigator (20% effort). “EPC IV RFTO #48- Measuring Healthcare Organization Characteristics in Cancer Care Delivery Research” with Eric Bass/ Claire Snyder
AHRQ
Conducted a review of peer-reviewed and gray literatures to produce a technical report on the influences of organizational characteristics on cancer care screening, treatment and delivery. (75Q80122F32010)

2019-2022 Co-Investigator (10%). “Strategies for Improving Prescription Opioid Use in Perioperative Pain Management”
Marie Hanna and Anping Xie, Principal Investigators
CDC
Developed a Perioperative Pain Program (PPP) to coordinate the continuum of care for surgical patients on chronic opioid therapy throughout the perioperative period. The objective of the proposed project was to evaluate the implementation and effectiveness of the PPP. (R01CE003150-01-00)

2015-2022 Multiple Principal Investigator (25-30%). “Comparative Effectiveness of Health System vs. Multilevel Interventions to Reduce Hypertension Disparities” with Lisa Cooper
NHLBI/PCORI
This project sought to reduce disparities in blood pressure management for patients with hypertension and one other major comorbidity. An intensive intervention featuring collaborative care teams, community health workers and specialist consultation in 15 practices was compared to an enhanced standard of care condition in 15 practices that focused on clinic-based intervention rather than intervention that reaches into the community. (4 UH3 HL130688-02)

- 2019-2022 Co-Investigator (10%). “Making health care safer for older adults receiving skilled home health care services after hospital discharge”
 Alicia Arbaje, Principal Investigator
 AHRQ
 Provided expertise in health services research, implementation science, and stakeholder engagement methods during intervention development and feasibility testing of a patient safety checklist for transition from hospital into skilled home health care. (R01HS026599)
- 2021-2022 Multiple Principal Investigator (10%). “Combatting Racism through Medical and Management Training (CoMMiT)– Developing and Testing Evidence-Based Approaches”
 with Lisa Cooper
 Merck Foundation
 Developed and evaluated a 12-hour modularized curriculum to address awareness and give tools to combat racism for trainees who will eventually enter the healthcare field.
- 2021 Co-Investigator (5%). “Evaluating home healthcare agency and home healthcare professional responsiveness to safety threats during older adults’ care transitions in the era of COVID-19”
 Alicia Arbaje, Principal Investigator
 AHRQ
 The goal of this study was to understand the impact of the pandemic on older adults’ hospital-to-home experiences and identify best practices to address risks to older adult safety when they return from the hospital. (3R01HS026599-02S1)
- 2018-2021 Co-Investigator (2%). “Missing Data Matters: Substance Use Disorder Clinical Trials”
 Daniel Scharfstein (Uz), Principal Investigator
 NIH/NIDA
 Developed, implemented and disseminated an innovative sensitivity analysis methodology and open-source software tool to evaluate the robustness to missing data assumptions of clinical trials in which binary outcomes are collected at fixed points over time but where participants intermittently miss their scheduled assessments, as frequently occurs in addiction research. Reanalyzed data from 29 substance abuse clinical trials conducted by NIDA’s Clinical Trials Network and available publicly on NIDA’s DataShare website.
 (1 R01DA044158-01)
- 2019-2021 Principal Investigator (10-20%) “An Implementation Science Study of Nursing Use of Music for Pain (M4P)”
 Johns Hopkins University Discovery Award

The project reviewed the literature, identified current nursing Johns Hopkins Hospital practices in the use of music to help patients manage pain. Included pilot testing of an evidence-based intervention implementation plan.

- 2019-2020 Co-Investigator (5%). “Impact of Certified Infection Preventionists on Infection Control and Hospital-Associated Infections”
Yea-Jen Hsu, Principal Investigator
Certification Board for Infection Control (CBIC)
Advised a project analyzing the impact of CBIC certification of infection preventionists on institutional rates of healthcare acquired infections.
- 2018-2021 Principal Investigator (3-15%). “Accelerating Collaborations for Evaluation Matching Service.”
with Albert Wu
Evidence for Action Program (E4A) of the Robert Wood Johnson Foundation
Project identifies and facilitates researcher matches for unsuccessful applicants to the Evidence for Action program office. E4A funds research on policies, programs and projects that promote a Culture of Health.
- 2015-2020 Principal Investigator (0-5%). “Accelerating Change and Transformation in Organizations and Networks III (Action III) Partnership Management and Administration.”
Agency for Healthcare Research and Quality
Lead and coordinate a network of 51 organizations to bid as a preferred source on AHRQ-released Task Orders in the area of quality and patient safety. Facilitate growth and development of researchers through RFTO response process and oversight of conduct of TOs.
- 2015-2019 Principal Investigator (5%). “Adult Immunization in Primary Care Practices”
Subcontract to American College of Physicians.
(ACP Funder: Centers for Disease Control and Prevention)
Project includes evaluation of the wider dissemination of the ACP primary care practice collaboratives seeking to increase adult immunizations.
- 2014-2018 Co-Investigator (15%). “Institute for Clinical and Translational Research”
NCATS, NIH
Daniel Ford, Principal Investigator
Act as one of two translational research community leads for the Behavioral, Social and Systems Science TRC.
- 2016-2019 Co-Investigator (10-15%). “What is Patient Safety in the Medical Home?”
Agency for Healthcare Research and Quality
Sydney Dy, Principal Investigator
Examined the implementation of patient safety measures in 9 level 3 PCMH practices using qualitative and quantitative perspectives. Surveyed 30 PCMHs.

- 2014-2019 Co-Investigator (0-5%). “Trial of Integrated Smoking Cessation, Exercise and Weight Management in SMI.”
NIMH
Gail Daumit, Principal Investigator
Provided advice on implementation science, qualitative methods and change management. (R01MH104553)
- 2017-2018 Principal Investigator (5%). “Marginal and Underserved Populations Within the Patient-Centered Medical Home: Addressing Gaps in the Literature with Evidence from a Statewide Multi-Payor Pilot Scheme.”
Primary Care Consortium, Johns Hopkins School of Medicine.
Project tested the effectiveness of Maryland PCMHs relative to comparisons in caring for consistently high cost patients as well as changes in patient mix in PCMHs over time.
- 2015-2017 Consultant (10%). “Care Coordination Measures from Encounter Data for Medicare Advantage Plans”
IMPAQ International, LLC
Provide advice on measurement development for care coordination using CMS MA encounter data.
- 2012-2017 Collaborator (5%). “Comprehensive CVD Risk Reduction Trial in Persons with Serious Mental Illness”
NIH/NHLBI
Gail Daumit, Principal Investigator
This was a randomized trial in psychiatric rehabilitation programs to test a practical, comprehensive cardiovascular risk reduction program where an interventionist will work with participants on heart healthy behaviors and coordinate treatment of risk factors with primary care. If successful, the intervention will be a model program that could be disseminated widely and should reduce health disparities in cardiovascular disease risk in persons with serious mental illness. (1R01HL112299-01)
- 2015-2017 Principal Investigator (5%). “Chronic Pain: Quality Connect Collaborative”
American College of Physicians.
Project evaluated the wider dissemination of an ACP primary care practice collaborative seeking to improve management of chronic pain.
- 2015-2017 Principal Investigator (5%). “Diabetes Management: Quality Connect Collaborative”
American College of Physicians.
Project evaluated an ACP primary care practice intervention seeking to improve management of diabetes.
- 2014-2016 Co-Investigator (5%) “Disparities in cardiovascular care screening & treatment in physician practices”

AETNA Foundation

Darrell Gaskin, Principal Investigator

Project analyzed the National Ambulatory Medical Care Survey (NAMCS) and other data from the state of Massachusetts for evidence of screening and treatment disparities in ambulatory care practices.

- 2015-2016 Principal Investigator (20%). “Diabetes Quality Improvement Program”
CECity
The major goal of the project was to develop a Diabetes Quality Improvement initiative to be implemented in an Accountable Care Organization.
- 2013-2015 Co-Investigator (15%). “Improving Health Outcomes: Blood Pressure”
American Medical Association
Peter Pronovost and Lisa Lubomski, Principal Investigators
Developed and implemented a pilot collaborative of 10 primary care practices in Illinois and Maryland to develop a scalable blood pressure management program. Involved in measurement design and evaluation of the pilot and phase 2 scale-up.
- 2013-2015 Principal Investigator (5%). “Adult Immunization in Primary Care Practices”
Centers for Disease Control and Prevention.
Subcontract to American College of Physicians.
Evaluation of primary care practice collaboratives in six states to increase adult immunizations.
- 2012-2015 Co-Investigator (10%). “Emerge: ICU/Acute Care Multi-site Demonstration Project.”
Gordon and Betty Moore Foundation, Peter Pronovost, Principal Investigator
Project sought to improve engagement of patient and family in ICU care and create a new EMR interface that provides more information in a more digestible format. Leading the aim to create a learning and accountability system to produce continuous learning of ICU staff and managers in 2 Maryland ICUs. Trained 2 California ICUs in use of CUSP.
- 2011-2015 Principal Investigator (15%). “Evaluation of the Maryland Multi-Payer Patient Centered Medical Home Program.”
Maryland Health Care Commission, Subcontract to IMPAQ International, LLC.
Evaluation of the Maryland Multipayer Patient Centered Medical Home demonstration project involving 53 practices. Assessment featured surveys of patients and providers, claims data analysis and qualitative analysis of interview data from participating sites. Outcomes included quality, cost, access, utilization, disparities, practice environment and culture, satisfaction and experience of care.
- 2010-2015 Co-Investigator (15%). “Cardiac Surgery Outcomes: Comparing the Comprehensive Unit-Based Safety Program (CUSP) and Translating Evidence into Practice (TRiP) to Passive Reporting.”

Agency for Healthcare Research and Quality, Peter Pronovost, Principal Investigator

Project aimed to reduce healthcare acquired infections among Cardiac surgery patients by implementing CUSP and HAI prevention in cardiac operating rooms, cardiac intensive care and on the floors. Led quantitative evaluation and an aim on interventions to improve relationships between separate units/ clinical areas of 17 participating hospitals.

- 2010-2015 Co-Principal Investigator (15%). “Multi-method system-level quality improvement intervention to reduce hypertension disparities.”
National Heart, Lung and Blood Institute. Lisa Cooper, Principal Investigator and Jill Marsteller, Co-Principal Investigator.
Known as Project ReDCHiP, this effort was part of the Hopkins Center for Eliminating Racial Disparities in Cardiovascular Disease. This pragmatic clinical trial tested whether three quality improvement interventions (training in blood pressure measurement, care management for patients, and clinician education) could reduce racial disparities in guideline concordant care and blood pressure control.
- 2013-2014 Co-Investigator/ Advisor (2%). “Evaluation Of Stage 3 Meaningful Use Objectives in Hospitals” 09/26/2013-09/01/2014.
Agency for Healthcare Research and Quality. Hadi Kharazzi, Principal Investigator.
Provided advice on organizational factors affecting MU3 implementation. (HHS A290201000271 – R)
- 2011-2012 Advisor (0%). “SocioWorks SBIR grant” Sept. 2011-2013
National Institute on Aging. Allen Tien, Principal Investigator.
Provided advice on development of a web-based social network analysis program as related to research in healthcare delivery systems.
- 2008-2012 Co-Investigator (20%). “National Implementation of the Comprehensive Unit-Based Safety Program (CUSP) to reduce Central-Line Associated Blood Stream Infections (CLABSI) in the ICU” AHRQ, subcontract to Health Research & Educational Trust, Peter Pronovost, Principal Investigator.
Project aimed to reduce central-line associated blood stream infections in ten states. Led Hopkins team effort to implement learning collaboratives in 4 states and participated in evaluation of success.
- 2008- 2011 Co-Investigator (10%). “Locating Errors through Networked Surveillance (LENS).” Society of Cardiovascular Anesthesiologists Foundation, Peter Pronovost, Principal Investigator.
Project to improve patient safety during cardiovascular surgery. Leading survey data analysis of cardiac surgery physicians and staff and interviews of managers involved in cardiac surgery at five hospitals.

- 2008-2010 Co-Investigator (5%). “Maximizing Independence at Home (MIND@Home-Phase II).” Jewish Community Federation of Baltimore/The Harry and Jeanette Weinberg Foundation, Inc., Quincy Samus, Principal Investigator
Project to create and evaluate use of pro-active case identification and care coordination model to identify community-dwelling elders with early signs of dementia; to assess individual needs related to dementia and randomize participants to intervention or usual care; and to provide intervention participants with a care coordinator who will link them to resources to manage their dementia and help them remain in the community for as long as possible. Advised the development of organizational and other evaluative surveys.
- 2008-2010 Principal Investigator (20%). “Capturing Implementation Context: the Team Checkup Tool.” Robert Wood Johnson Foundation, Jill Marsteller, Principal Investigator.
Project to develop and validate an instrument to measure quality improvement team activities and interaction in the hospital intensive care unit setting.
- 2009-2010 Co-Principal Investigator (15%). “Transition Supplement: Linking Blood Stream Infections to Intensive Care Nursing.” Robert Wood Johnson Foundation, David Thompson, Co-Principal Investigator.
Project to replicate previous study, “Linking Blood Stream Infections to Intensive Care Nursing Context of Care and Process.” Implements and evaluates a collaborative to reduce bloodstream infections (BSI) among hospitals in a single state.
- 2007-2010 Co-Investigator (10%). “Medication Monitoring for Vulnerable Populations via IT, Agency for Healthcare Research and Quality, Christoph Lehmann, Principal Investigator, 2007–2009 (Extended to May 2010).
Project to demonstrate the ability of health information interoperable exchange and electronic health records (EHR) to generate useful quality and safety measures for the vulnerable population served by the Baltimore Medical System (BMS) Community Health Center (CHC). Led the surveys and interviews of providers on usefulness of feedback and responses to abnormal lab values.
- 2008-2009 Co-Principal Investigator (10%). “Augmentation of Guided Care.” John A. Hartford Foundation, Chad Boulton, Co-Principal Investigator.
For an augmentation of the Guided Care grant assessing the appeal of Guided Care to nurses and primary care practices. Project described physician practice characteristics, assesses Guided Care nurse, physician and staff satisfaction with Guided Care and evaluates any changes in practice environment due to Guided Care.
- 2007-2009 Co-Investigator (5-11%). “BPHC Program Performance Analysis.” Bureau of Primary Health Care, Health Services Research Administration, Leiyu Shi, Principal Investigator.

Project to conduct intermediate to long-term studies that have policy relevance to health centers and the mission of BPHC/HRSA. Examining CHC readiness to expand services to the aging and chronically ill.

- 2006-2008 Co-Principal Investigator (20%). “Linking Blood Stream Infections to Intensive Care Nursing Context of Care and Process.” Interdisciplinary Nursing Quality Research Initiative, Robert Wood Johnson Foundation, David Thompson, and Bryan Sexton, Co-Principal Investigators.
Project implemented a collaborative to reduce bloodstream infections (BSI) among hospitals in a large faith-based system. Led the administration and analysis of surveys measuring exposure to elements of the intervention and monthly surveys of implementation activities undertaken, quality improvement team functioning and barriers to implementation progress. Worked with other PIs in acting as collaborative faculty and analyzing relationships among nursing process, work context, implementation fidelity and BSI rates.
- 2005-2008 Co-Investigator (5%). “Translating Research into Action: The Johns Hopkins Home Hospital.” John A. Hartford Foundation, Bruce Leff, Principal Investigator.
Led the effort to develop methodology to measure the readiness of clinical teams at dissemination sites to implement Hospital at Home (HAH). Working with PI to maximize readiness of dissemination organizations for successful implementation of HAH. Also leading the analysis of the provider satisfaction data from the HAH pilot.
- 2006-2008 Consultant (9%). American College of Physicians’ Center for Practice Innovation, Physician’s Foundation for Health System Excellence. Michael S. Barr, Principal Investigator.
Evaluation advice and adaptation of quality improvement methods and measurement for small practices of fewer than 10 physicians.
- 2006-2008 Co-Investigator (10%). “Integrating Population-Based Healthcare with Medical Services: Evaluation of a Multi-Disciplinary Model for Coordinating Primary Care with Disease Management.” Health Industry Forum, Brandeis University, Peter Fagan, Principal Investigator.
Co-Investigator (10%). Led the design, development, administration and analysis of nurse interviews and physician surveys assessing satisfaction and attitudes toward P4P and the addition of a disease management coordinator to the primary care office.
- 2004-2005 Co-Investigator (10%). “Statewide Efforts to Improve Care in Intensive Care Units.” Agency for Healthcare Quality and Research, Peter Pronovost, Principal Investigator.
In-depth assessment of team functioning on teams participating in an intervention created by Hopkins medical staff to improve quality of care in Intensive Care

Units. Work included developing instruments for team functioning, turnover and spread.

- 1999-2003 Co-Investigator (50%). “Improving Chronic Illness Care Evaluation.” Robert Wood Johnson Foundation. Emmett Keeler, Stephen Shortell, Shan Cretin, Principal Investigators.
This was a joint RAND/UC Berkeley independent evaluation of the Chronic Care Model developed by the MacColl Institute at Group Health of Puget Sound and the Breakthrough Series training method by the Institute for Healthcare Improvement. Assisted in all aspects of the organizational evaluation.
- 2000-2003 Co-Investigator (10%). “Family Visitation/Viewing Policies for Presumed SIDS in California and Disparities in Patient Satisfaction at an Urban County ER.” Funded by Russell Braun, MD, MPH, MBA, Dr. Braun, Principal Investigator. This research focused on emergency room topics. Assisted in data collection, led data management and analysis.
- 1997-1998 Co-Principal Investigator. “Variations in the Uninsured: State and County-Level Analyses.” Blue Cross and Blue Shield United of Wisconsin.
Looked at impact of state regulations on state prevalence of the uninsured; also collapsed years of county level data for ~30 counties in the state of Wisconsin to look at local employment market influences on uninsurance rates. Responsibilities were to act as project manager, create analytic design for county-level analysis, collect relevant data from secondary sources (e.g., regulatory information, county-level data), adapt multivariate analyses at the state level from an earlier project, interpret analytic findings, author report.
