

# Capital Budgeting

## Generate Maximum Return

Effective leaders make investment decisions that allocate limited capital resources to achieve organizational goal, while minimizing risk. Great leaders stand out not because they have access to particularly rich information, but because they seek the most useful information and accurately evaluate both the risk and potential return. Capital budgeting is a key strategic skillset that leaders must possess to ensure that capital resources are strategically implemented to generate maximum return. This course aims to equip business leaders with the terminology, skillset, and the strategic mindset required to navigate a complex business environment, evaluate competing investment options, execute budgeting decisions that achieve goals, and effectively communicate their decisions and impact.

## FACULTY

Ge Bai, PhD, CPA is an associate professor of Accounting at the Johns Hopkins Carey Business School and an associate professor of Health Policy & Management at the Johns Hopkins Bloomberg School of Public Health. She is an expert on health care reimbursement, cost management, and pharmaceutical supply chain. Dr. Bai has published in leading academic journals such as the New England Journal of Medicine, JAMA, JAMA Internal Medicine, Annals of Internal Medicine, Health Affairs, Decision Sciences, Accounting Horizons, and Journal of Business Ethics. Her work has been widely featured in Atlantic, CBS, CNN, Forbes, Fox News, Los Angeles Times, NBC, New York Times, NPR, The Guardian, U.S. News & World Report, Washington Post, and other media and used as testimony before the Congress.

## WHO SHOULD ATTEND

Professionals of any level, and in any function, who make spending decisions and budget allocation determinations and who need to understand how risk and return affect internal financial management decisions.
