

Building Responsible Leaders

The Edward St. John Real Estate Program

Degrees in Real Estate and Infrastructure

Advance your career and develop your leadership skills in a thriving industry

From resurgent markets; to landmark groundbreakings; to the major challenges posed by aging arteries of roads, bridges, and public utilities, real estate and infrastructure issues are in the news today more than ever before.

Here is a complex and dynamic industry, a significant component of global capital markets and the economy. To remain competitive in this challenging field, today's real estate and infrastructure professionals must have an intimate understanding of the issues and concepts associated with multiple disciplines, including development, finance, investment, planning, and design.

The Master of Science in Real Estate and Infrastructure degree from the Johns Hopkins Carey Business School's Edward St. John Real Estate Program prepares graduate students to be exceptional industry leaders and innovative experts. Whether experienced professionals or relatively new to the industry, all of our students receive a multidisciplinary, comprehensive education that affords them a competitive advantage for a lifetime.

Students work with faculty composed of Johns Hopkins professors and practitioners from the region's leading planning, architectural, engineering, law, development, investment, and management firms. Through direct collaboration with faculty, students are exposed to challenges within the industry and develop the skills essential for successful careers. Fellow students are both motivated and focused, and bring a wealth of knowledge and experiences to the classroom.

Graduates from the Carey Business School hold leadership positions throughout the real estate and infrastructure field. This strong alumni base promotes professional networking and advancement, and creates a spirit of connection and involvement that lasts well beyond graduation. Earn your MS in Real Estate and Infrastructure or an MBA with a concentration in Real Estate and Infrastructure, and join our graduates in advancing the vision that shapes our towns, cities, and world.

“The Johns Hopkins MS in Real Estate program provided me with the key tools and resources to advance my career. I am now the co-founder and principal of my own real estate development company and I am continually grateful for the strong educational background and networking opportunities afforded by the program. I am always in touch with my former classmates and instructors, and greatly benefit from their ongoing industry insight.”

—Julia A. Kennedy
VICE PRESIDENT AND
CO-FOUNDER,
H STREET VENTURES LLC

“Quite simply, I would not be in my current position without my MS in Real Estate from Johns Hopkins. The market is well aware of the high caliber of real estate professionals the program creates, not to mention that in today’s fast-paced, ever-changing economy, professionals teaching professionals is the only way to approach an advanced degree.”

—Mike Schwartzman
VICE PRESIDENT
DEVELOPMENT,
CIM GROUP

One of the few programs of its kind in the nation, the Edward St. John Real Estate Program:

Prepares individuals for leadership careers in real estate, urban development, and infrastructure through rigorous and intensive interdisciplinary graduate real estate studies.

Conducts research projects and sponsors special seminars addressing relevant issues for the professional real estate and infrastructure community.

Provides continuing professional education programs for real estate and infrastructure professionals who wish to advance or enhance their careers through noncredit courses, conferences, and workshops.

Offers scholarship opportunities for qualified students.

Choose the real estate and infrastructure program that meets your professional goals and fits your schedule

Study and network with the industry's best

Students, alumni, and practitioner faculty of the program represent a wide spectrum of the region's leading firms. You'll be taught by, and study with, some of the best minds and most influential players in the industry, making your degree that much more valuable and leading edge.

Manekin
PNC
The Peterson Companies
St. John Properties

Whether you specialize in real estate and infrastructure development, finance, investment, law, management, community economic development, valuation, or brokerage, the graduate programs offered by the Edward St. John Real Estate Program provide an unmatched advantage. Classes are offered at convenient times in both Baltimore and Washington, D.C.

The Part-time MS in Real Estate and Infrastructure (36 credits)

Designed for mid-career real estate professionals with at least three years of industry experience, the part-time MS in Real Estate and Infrastructure accommodates full-time professionals as it provides a comprehensive understanding of the industry, with an emphasis on sustainable urban development. Most students can earn the degree in two years. Working with academic and practitioner faculty, participants develop the knowledge and skills needed to analyze, understand, and take advantage of the latest developments in this fast-changing profession.

The Full-Time MS in Real Estate and Infrastructure (36 credits)

This program is designed for real estate and infrastructure professionals with fewer than eight years of experience who are able to enroll as full-time students in a 12-month concentrated format. The course of study includes an optional internship in which students directly apply what they learned in the classroom. Internships are supervised by an industry mentor and a faculty member to ensure the academic and professional quality of the work experience. The program offers students from the U.S. and abroad a challenging full-time academic experience with in-depth individual academic counseling and advising.

MBA with Real Estate and Infrastructure Concentration (54 credits)

The MBA with Real Estate and Infrastructure Concentration offers a unique, multi-disciplinary curriculum that goes beyond the typical real estate courses in an MBA program. It gives students the advantage of completing a concentrated series of real estate courses in the context of a general business education. The real estate and infrastructure electives in the MBA program are the same as the comprehensive core courses in the MS in Real Estate and Infrastructure offerings. MBA students are able to take courses in the evenings without interruption to their careers. The MBA is designed to be completed in three years, although students can take up to six years to finish the program.
